Section 1: Identification

Product identifier

Product Name
• Opium tincture

Product Code
• NDC 0187-4203-04; NDC 0187-4203-16; NDC 42998-0203-01; NDC 42998-0203-02

Recommended use
• For the treatment of diarrhea.

Restrictions on use
• Refer to the product insert and/or prescribing information for restrictions on use and contraindications.

Details of the supplier of the safety data sheet

Manufacturer
• Valeant Pharmaceuticals North America, LLC
  400 Somerset Corporate Blvd.
  Bridgewater, NJ 08807
  United States
  valeant.com

Emergency telephone number

Manufacturer
• 1-800-535-5053 - US - Infotrac

Manufacturer
• +1 352-323-3500 - International - Infotrac

This safety data sheet is written to provide health, safety and environmental information for people handling this formulated product in the workplace. It is not intended to provide information relevant to consumer use of the product.

Section 2: Hazard Identification

UN GHS
According to: UN Globally Harmonized System of Classification and Labelling of Chemicals (GHS)

Classification of the substance or mixture

UN GHS
• Specific Target Organ Toxicity Single Exposure 3: Narcotic Effects
  Flammable Liquids 3

Label elements

UN GHS

WARNING

Hazard statements
• Flammable liquid and vapour
  May cause drowsiness or dizziness

Precautionary statements

Prevention
• Keep away from heat, sparks, open flames and/or hot surfaces. - No smoking.
  Keep container tightly closed.
Use personal protective equipment as required.

Response

- Call a POISON CENTER or doctor/physician if you feel unwell.
- In case of fire, use carbon dioxide, dry chemical powder, appropriate foam or water fog extinguishing media.

Storage/Disposal

- Store in a well-ventilated place. Keep cool.
- Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.

Other hazards

UN GHS
- No data available

---

### Section 3 - Composition/Information on Ingredients

**Substances**

- Material does not meet the criteria of a substance according to United Nations Globally Harmonized System of Classification and Labelling of Chemicals (GHS)

**Mixtures**

*The exact percentage of composition has been withheld as a trade secret.*

### Section 4: First-Aid Measures

**Description of first aid measures**

**Inhalation**
- Normal use of this product does not pose an inhalation hazard. However, should respiratory tract irritation develop, discontinue use and remove to fresh air. Get medical attention if irritation or other symptoms develop or persist.

**Skin**
- Wash skin with soap and water. If skin irritation occurs: Get medical advice/attention. Wash clothing separately before reuse.

**Eye**
- IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

**Ingestion**
- If swallowed, wash out mouth with water provided person is conscious. Seek medical attention.

**Most important symptoms and effects, both acute and delayed**
- Symptoms of toxicity are those of morphine and alcohol, such as nausea, vomiting, miosis, cool and clammy skin, respiratory and CNS depression, bradycardia, hypotension, and skeletal muscle flaccidity. Noncardiogenic pulmonary edema may develop after opioid overdose and monitoring of heart filling pressure may be helpful. Ethanol has been demonstrated to cause hypoglycemia in children or adults with limited glycogen stores. In severe overdosage, apnea, circulatory collapse, cardiac arrest, and death may occur.
Indication of any immediate medical attention and special treatment needed

**Antidotes**
- Initial management of opioid overdose should emphasize establishment of a secure airway and support of ventilation and perfusion. Meticulously monitor and maintain, within acceptable limits, the patient’s vital signs, blood gases, serum electrolytes, blood glucose, etc. Naloxone antagonizes most effects of opioids. Protect the airway as naloxone may induce vomiting. Since naloxone has a shorter duration of action than opioids, repeated doses may be needed. In patients who abuse opioids chronically, a withdrawal syndrome may be manifest on administration of naloxone. This may include yawning, tearing, restlessness, sweating, dilated pupils, piloerection, vomiting, diarrhea, and abdominal cramps. This syndrome usually abates quickly as the effect of naloxone dissipates. Absorption of drugs from the gastrointestinal tract may be decreased by giving activated charcoal, which, in many cases, is more effective than emesis or lavage; consider charcoal instead of or in addition to gastric emptying. Repeated doses of charcoal over time may hasten elimination of some drugs that have been absorbed. Since opium tincture can delay gastric emptying, evacuation of the stomach may be beneficial. Safeguard the patient’s airway when employing gastric emptying or charcoal. Monitor for and treat hypoglycemia.

---

**Section 5: Fire-Fighting Measures**

**Extinguishing media**
- **Suitable Extinguishing Media**
  - SMALL FIRES: Dry chemical, CO2, water spray or regular foam.
  - LARGE FIRE: Water spray, fog or regular foam.
- **Unsuitable Extinguishing Media**
  - No data available

**Firefighting Procedures**
- As in any fire, wear self-contained breathing apparatus and full protective gear to prevent contact with skin and eyes.

**Special hazards arising from the substance or mixture**
- **Unusual Fire and Explosion Hazards**
  - Contains flammable liquid.
- **Hazardous Combustion Products**
  - No data available
- **Advice for firefighters**
  - Structural firefighters’ protective clothing provides limited protection in fire situations ONLY; it is not effective in spill situations where direct contact with the substance is possible.

---

**Section 6 - Accidental Release Measures**

**Personal precautions, protective equipment and emergency procedures**

**Personal Precautions**
- Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Evacuate immediate area. Ventilate enclosed areas.

**Emergency Procedures**
- ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Keep unauthorized personnel away. Contain spilled product. For small spills, add suitable absorbent material. Scoop up and place in an appropriate liquid-tight container equipped with a tight cover for disposal. For large spills, dike spilled material or otherwise contain material to ensure runoff does not reach a waterway. Place spilled material in an appropriate, liquid-tight container equipped with a tight cover for disposal.

**Environmental precautions**
- Prevent spilled material from entering storm sewers or drains, waterways, and contact with soil.

**Methods and material for containment and cleaning up**
**Containment/Clean-up Measures**
- Isolate hazard area. Prevent from entering drains and sewers. Cover with vermiculite or other suitable inert material, pick up and place in closed containers. Transport outdoors and hold for waste disposal. Ventilate area and wash spill site after material pickup is complete. Refer to Section 13 for appropriate disposal procedures.

**Reference to other sections**
- Refer to Section 8 - Exposure Controls/Personal Protection and Section 13 - Disposal Considerations.

**Section 7 - Handling and Storage**

**Precautions for safe handling**

**Handling**
- Keep away from fire - No Smoking. Keep away from heat and sparks.

**Conditions for safe storage, including any incompatibilities**

**Storage**
- Keep tightly closed and store in upright position. Solution is flammable, keep away from heat or flame. Store at a controlled room temperature: 15-25C (59-77F).

**Section 8 - Exposure Controls/Personal Protection**

**Control parameters**

**Exposure Limits/Guidelines**
- Refer to the occupational exposure limits / guidelines for the individual product components.

**Exposure Control Notations**
- ACGIH
  - Ethanol (64-17-5): Carcinogens: (A3 - Confirmed Animal Carcinogen with Unknown Relevance to Humans)

**Exposure controls**

**Engineering Measures/Controls**
- NO SPECIAL CONTROLS ARE REQUIRED UNDER CONDITIONS OF INTENDED USE. Local exhaust ventilation should be provided when handling bulk product.

**Personal Protective Equipment**

**Respiratory**
- Where risk assessment shows that air-purifying respirators are appropriate, a NIOSH (US) or CEN (EU) -certified air-purifying respirator equipped with HEPA and organic vapor cartridges may be permissible under certain circumstances where airborne concentrations are expected to exceed exposure limits, when adequate oxygen is present and as a backup to engineering controls. Use a positive pressure air-supplied respirator if there is any potential for an uncontrolled release or any other circumstances where air purifying respirators may not provide adequate protection.

**Eye/Face**
- Avoid contact with the eye. No special controls or personal protection required under conditions of intended use. In the event of a spill, appropriate eye protection should be worn.

**Hands**
- Wear protective gloves.

**Skin/Body**
- No special personal protection required under conditions of intended use. In the event of a bulk spill, wear appropriate protective clothing.

**General Industrial Hygiene Considerations**
- Handle in accordance with good industrial hygiene and safety practice. Do not eat, drink or smoke during work. Avoid contact with skin, eyes or clothing. Wash thoroughly after handling.

**Environmental Exposure Controls**
- No special controls are required under conditions of intended use. In the event of a bulk spill, prevent spilled material from entering storm sewers or drains, waterways,

Section 10: Stability and Reactivity

Reactivity

- No dangerous reaction known under conditions of normal use.

Chemical stability

- Stable under normal temperatures and humidities.

Possibility of hazardous reactions

- No data available

Conditions to avoid

- Heat, direct sunlight.

Incompatible materials

- No data available

Hazardous decomposition products

- No data available

Other information

• Controlled Substance – Opium Tincture, USP (Deodorized), is a Schedule II drug. Addiction can result from opium usage. Opium preparations should be given in the smallest effective dose and as infrequently as possible to minimize the development of tolerance and physical dependence.

Section 12 - Ecological Information

Toxicity

• This material has not been tested for environmental effects.

Persistence and degradability

• No data available

Bioaccumulable potential
• No data available

**Mobility in Soil**

• No data available

**Other adverse effects**

### Section 13 - Disposal Considerations

#### Waste treatment methods

**Product waste**

- Waste characterizations and compliance with applicable laws are the responsibility solely of the waste generator.

**Packaging waste**

- Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.

### Section 14 - Transport Information
