

FOTOTAR[®] CREAM

PSORIASIS AND SEBORRHEIC DERMATITIS CREAM

DESCRIPTION:

FOTOTAR[®] Cream contains coal tar extract (equivalent to 2% Coal Tar, USP) in an emollient, moisturizing cream base.

INDICATIONS:

For the relief of itching, irritation, and skin flaking associated with psoriasis and seborrheic dermatitis.

CONTRAINDICATIONS:

FOTOTAR[®] Cream is contraindicated in patients with a history of sensitivity to this product or to other coal tar products. FOTOTAR[®] Cream should not be used on patients who have a disease characterized by photosensitivity, such as lupus erythematosus or allergy to sunlight.

DIRECTIONS FOR USE:

Apply to affected areas one to four times daily or as directed by a physician.

WARNINGS:

FOR EXTERNAL USE ONLY.

Avoid contact with eyes. If contact occurs, rinse eyes thoroughly with water. If condition worsens or does not improve after regular use of this product as directed, consult a physician. Use caution in exposing skin to sunlight after applying this product. It may increase your tendency to sunburn for up to 24 hours after application. Do not use this product in or around the rectum or in the genital area or groin except on the advice of a physician. Do not use for prolonged periods without consulting a physician. Do not use this product with other forms of psoriasis therapy, such as ultraviolet radiation or prescription drugs, unless directed by a physician. If condition covers a large area of the body, consult your physician before using this product.

Keep out of reach of children. In case of accidental ingestion, seek professional assistance or contact a Poison Control Center immediately.

PRECAUTIONS:

Staining of clothing may occur which is normally removed by standard laundry methods. Use on the scalp may cause temporary staining of light colored hair.
